KINGDOM OF SAUDI ARABIA

Company History

LAUNCH

2000

High Dam established in 2000 working in small residential construction projects in Riyadh city, and after gaining good experiences in successfully managing such projects with several clients, High Dam started small-medium construction projects & medium – large O&M projects with governmental sectors.KSA.

NEW IDENTITY

2005

High Dam Group evolved and diversified as a specialized equipment supplier in (Aviation Sector – Military & Civil) due to the experience of founders in this industry & to the rigid relations with many globally known manufacturers of GSE “Ground Support Equipment”, Fuel Handling Equipment and Airports Systems (Land side & Air Side).

TRANSFORMATION

2012

Focusing in becoming known player in chosen markets & increase company's market share. Adopting latest technologies and practices in business. Targeting new specific customer segments. Strengthening relationships with current vendors/suppliers & simultaneously developing new vendors/suppliers.

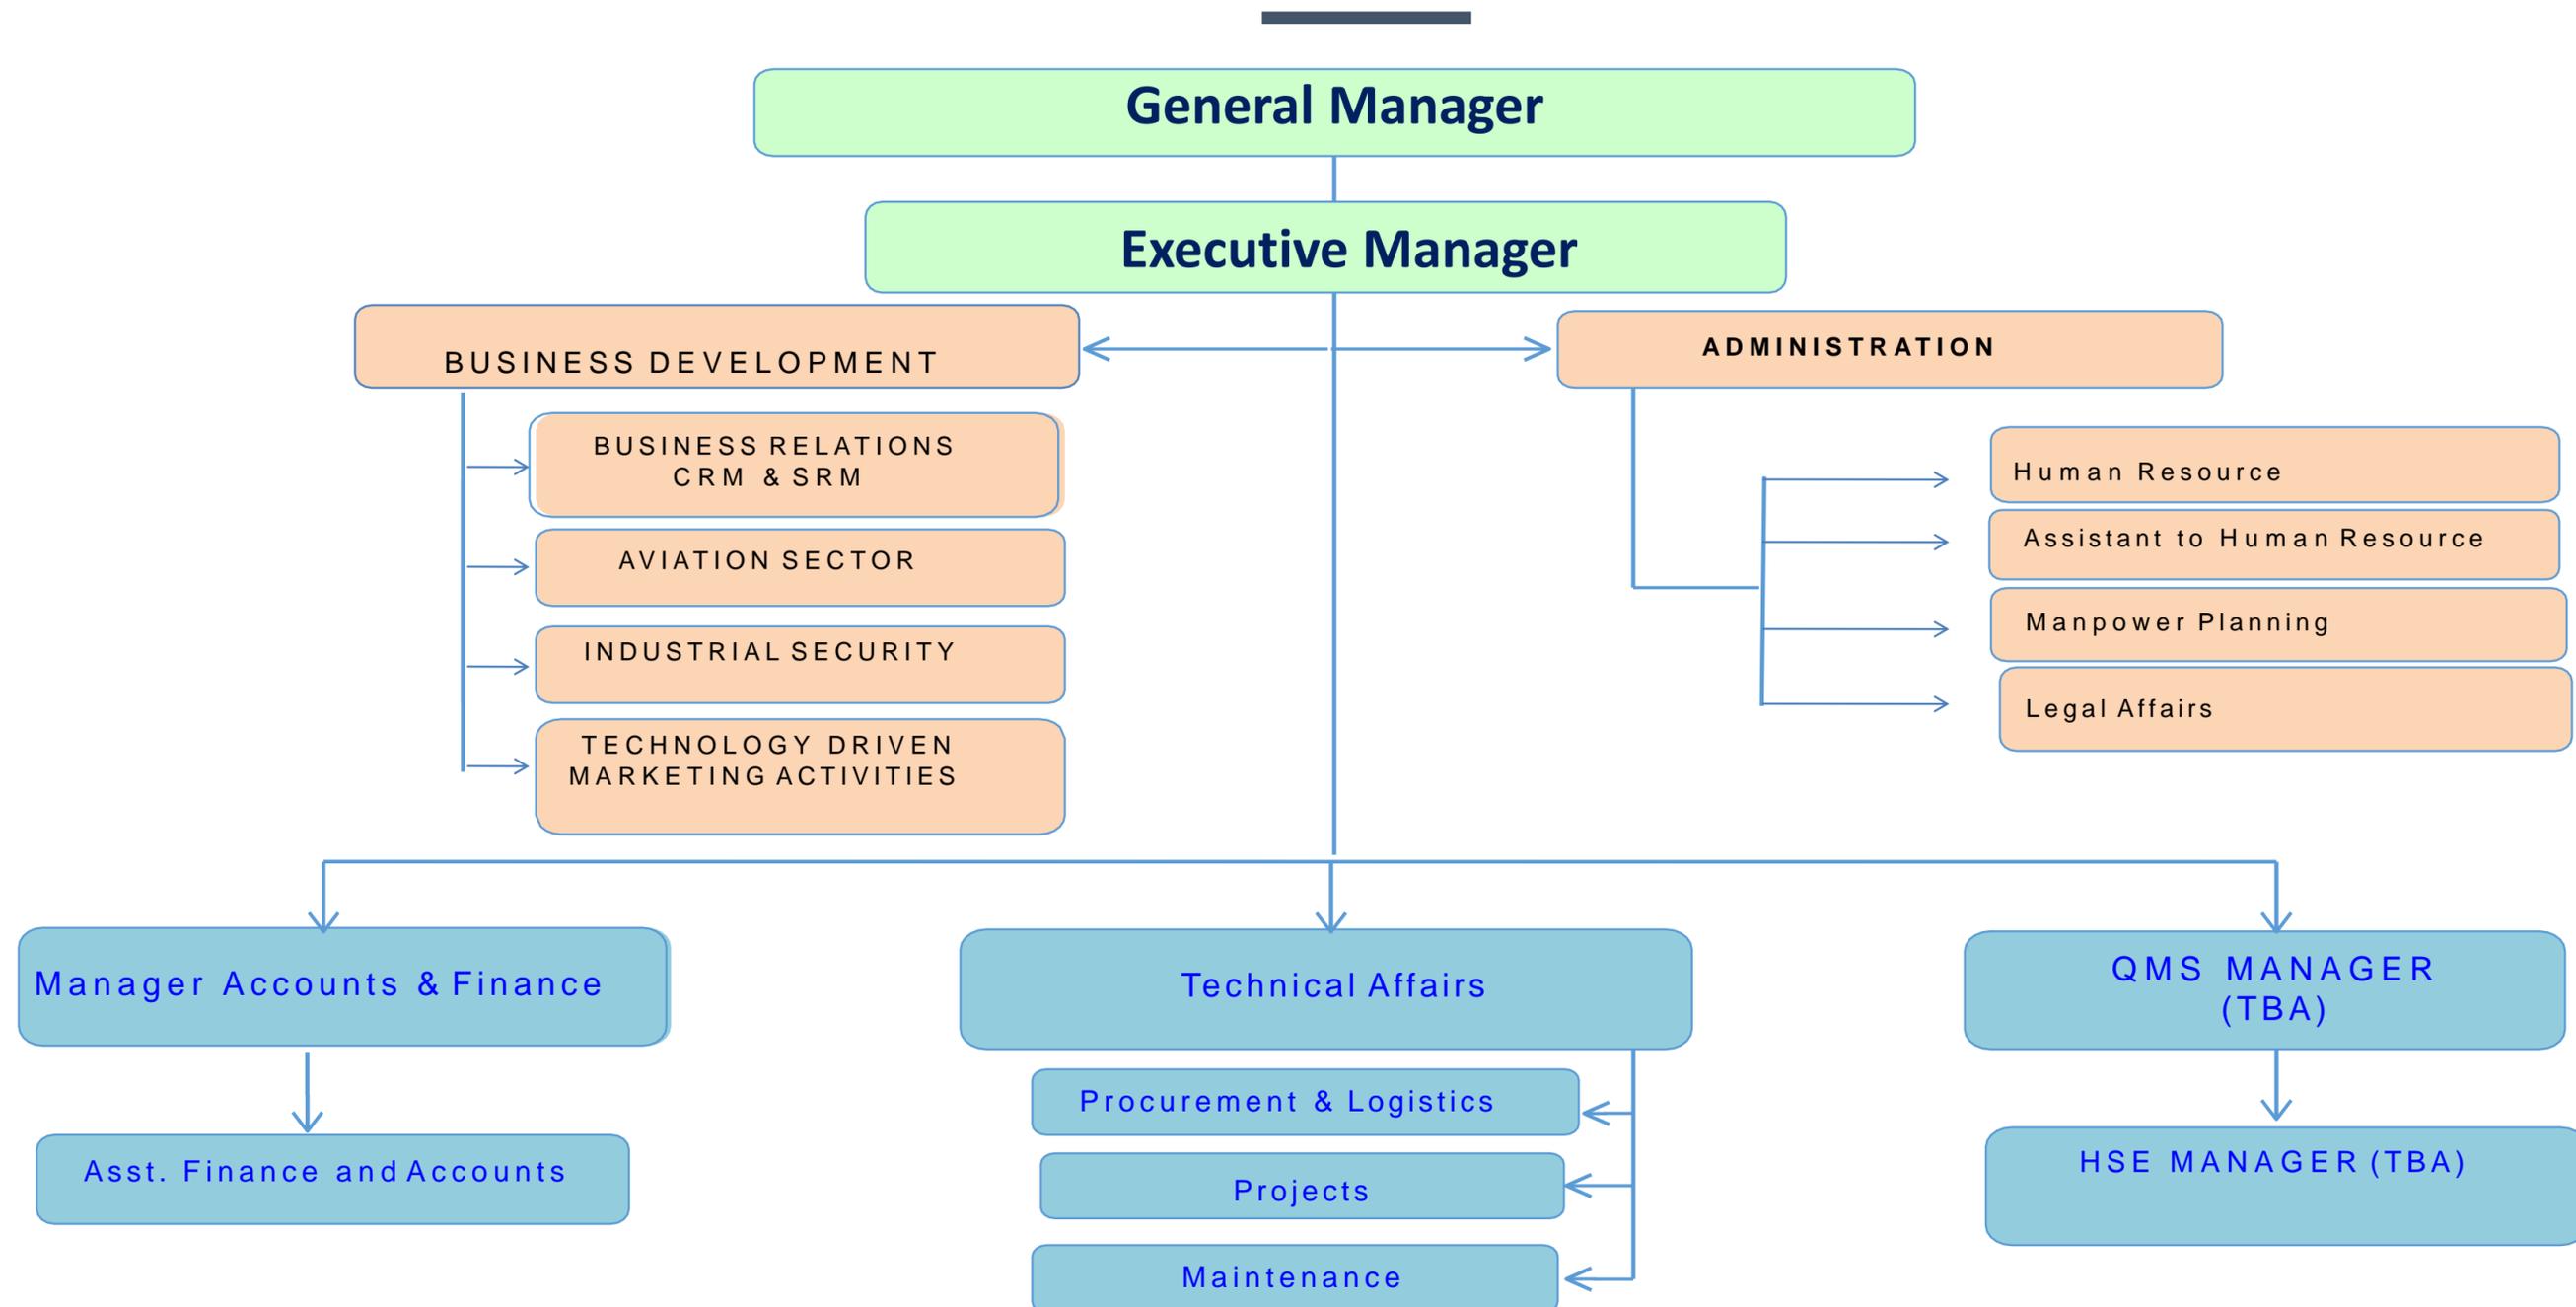

NOW

2018-21

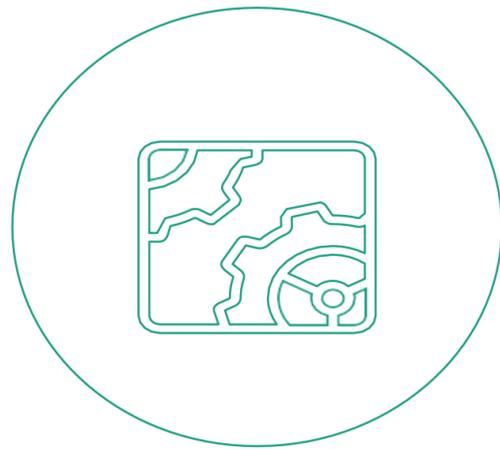

High Dam expanded its portfolio by building capability of providing Security & protection Systems for government/private premises, airports, rail way stations, prisons....etc, and it is proudly been approved as a supplier/service provider in this sector from MOI/Saudi Arabia.

HDG Organizational structure

High Dam Security Systems

.....

Check point

The Spectrums 6040/6550/7560 are all made up of robust equipment specifically designed to meet the needs and applications that demand high inspection and image quality, such as airports, prisons, railways and subways, stadiums, courts, secured premises where high security is required.

Large Baggage & Pallets Scanner

Pallet Scanners full fill the Inspection needs of warehouses, shippers, custom brokers, and couriers for the airports.

The Spectrum 150180 is an x-ray inspection system with a high level of performance, greater sharpness and image quality.

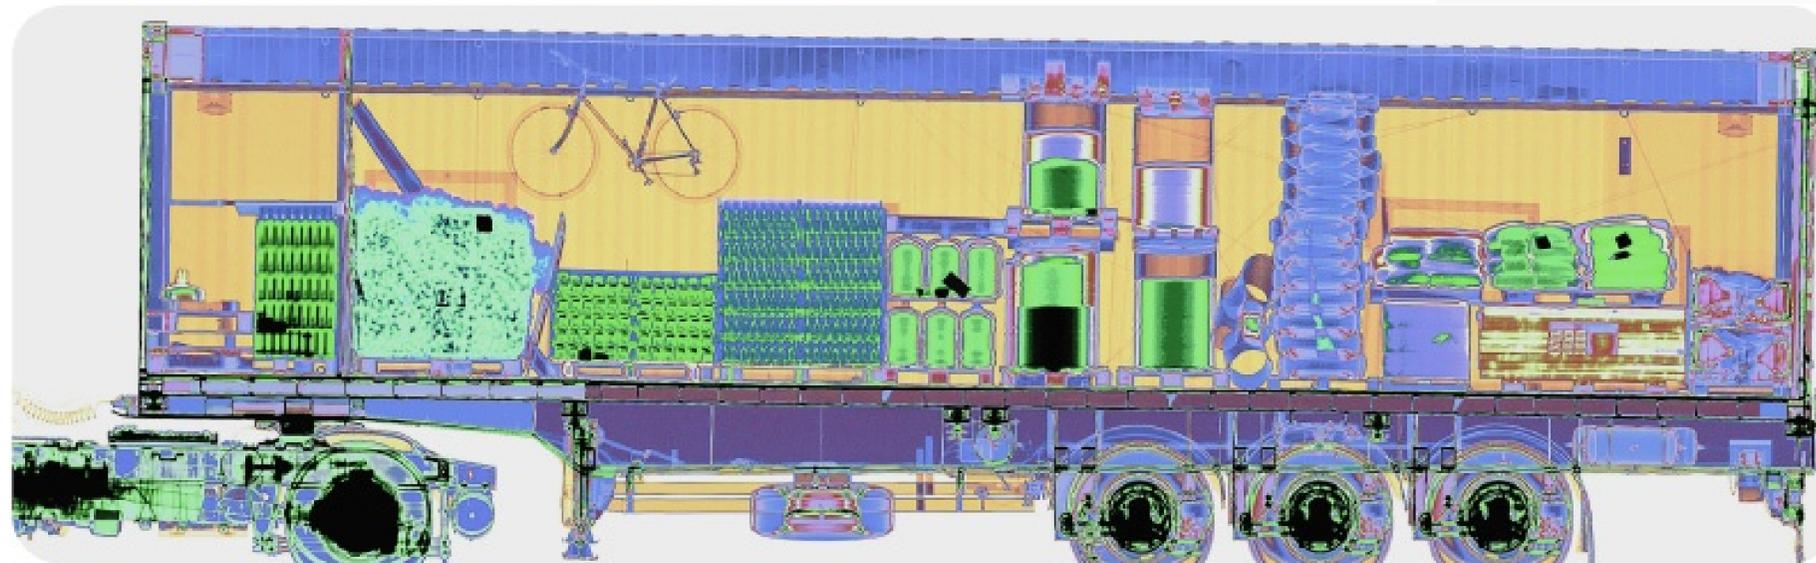

Mobile Van

The Spectrum100100 VAN offers an extremely suitable solution for inspections; due to their mobility it is ideal for mobile inspections of large luggage, packages and freight at police checkpoints, large events, airports, stadiums, highways, and subway stations, among others.

Scanner for trucks and containers.

Effective inspection of small and mid-sized cars on roads, border control and high security location

CBRN Solutions

With our globally known suppliers' coherent and integrated CBRN solutions our clients will have efficient tools to detect and identify a wide range of threats and receive the support needed for providing fast and accurate early warning.

Anti Drone Solutions

Anti drone systems to detect and/or intercept unwanted drones and unmanned aerial vehicles (UAVs).

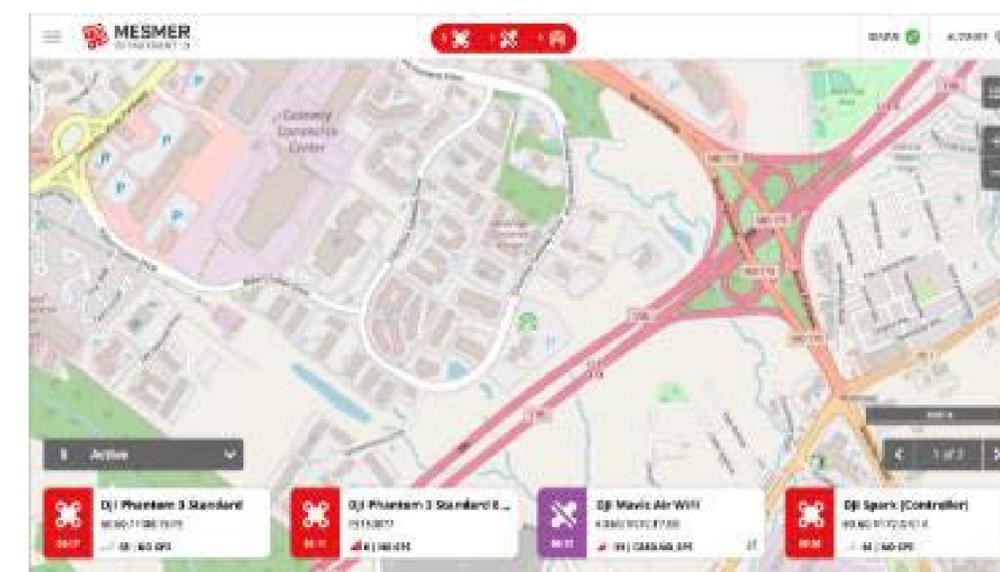

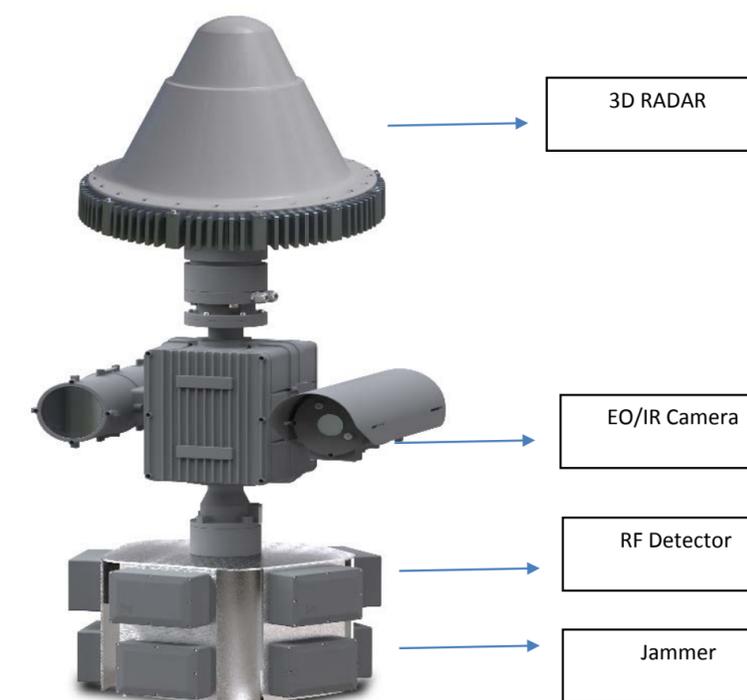

Hostile drones may be used to deploy explosives, smuggle contraband or gather intelligence on sensitive assets, and the proliferation of low-cost UAVs has led to an increase in incidents.

Anti drone technology is deployed to protect areas such as airports, critical infrastructure, large public spaces such as stadiums, and military installations and battlefield sites.

Tailoring Anti Drone Solutions

Depending on requirements for range, size of protection zone, number of simultaneous targets to track, and ability to deal with environmental clutter, multi-sensor anti-drone systems will combine different sensor types along with sensor fusion algorithms to provide a complete integrated solution

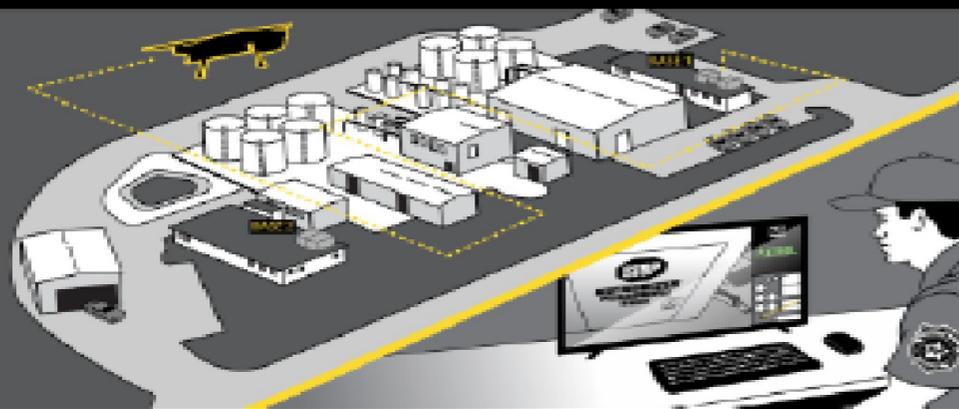

Security Drones (THE SMARTEST EYES IN THE SKY)

On duty 24/7

Flying scheduled patrols day and night, in rain, wind and dust storms, automatically responds to alerts, can be airborne in 30seconds, transmit live video feeds, lands, recharges, communicates and reports maintenance needs – all by itself.

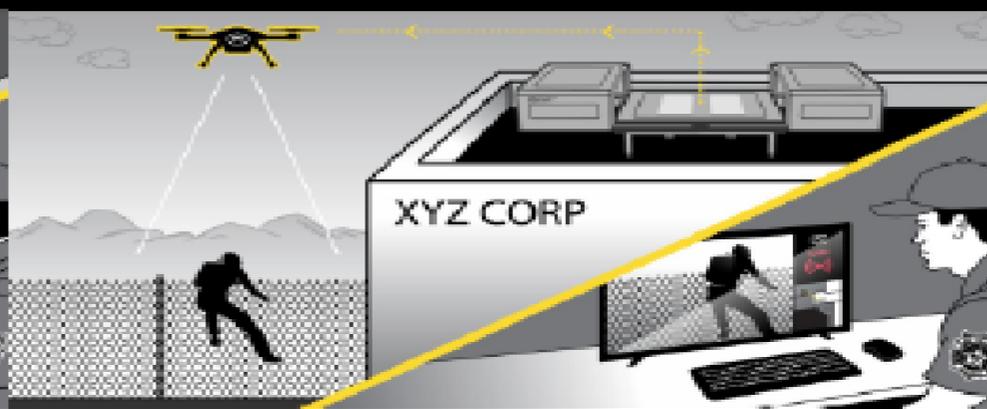

Automated Patrols

Scheduled missions at a specific time and route to perform repetitive patrols. It is as easy as creating a calendar event.

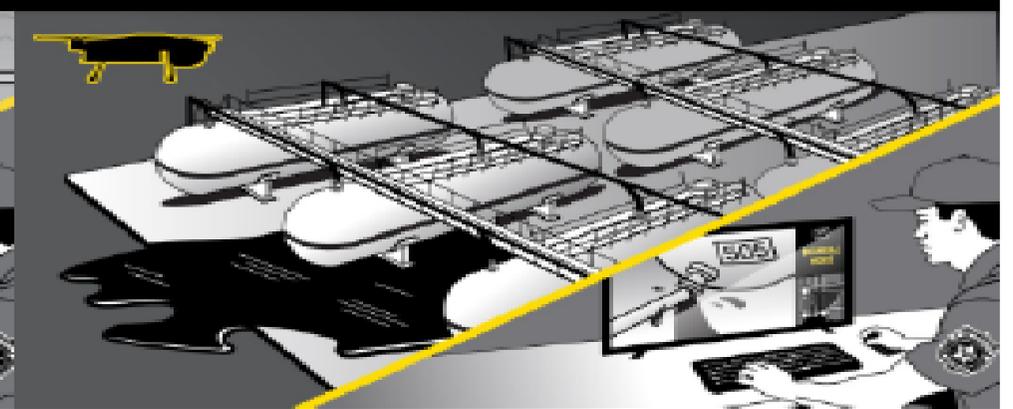

Rapid Response

Flying is the fastest way to get eyes on an incident. We can integrate with perimeter sensors to automatically dispatch our drone to incident location.

Aerial Reconnaissance

It's much easier and cost effective to cover a large area efficiently from the air. Have a camera on target anywhere, anytime at your facility.

Security Drones (THE SMARTEST EYES IN THE SKY)

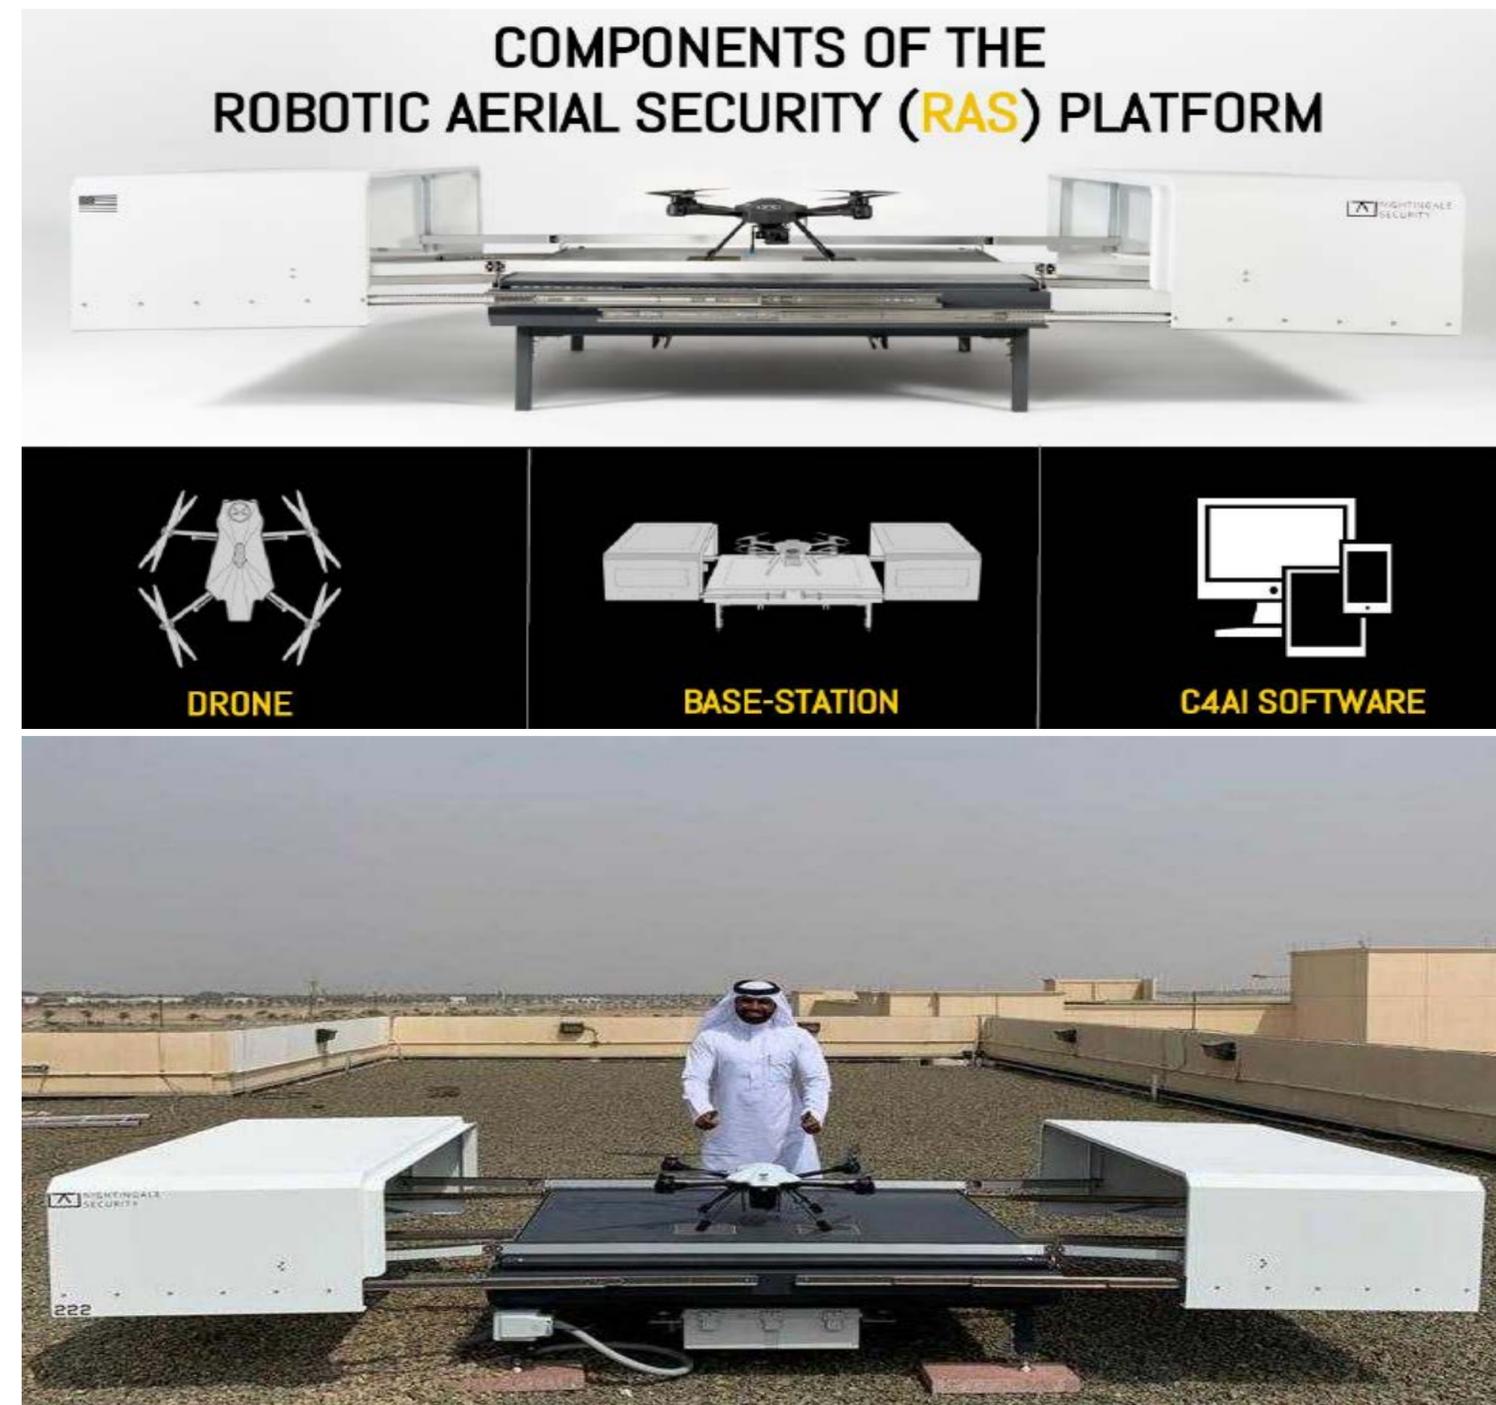

Strong and silent type.

Vigilant and ready to respond.

Highly capable working alone and even better as part of a team.

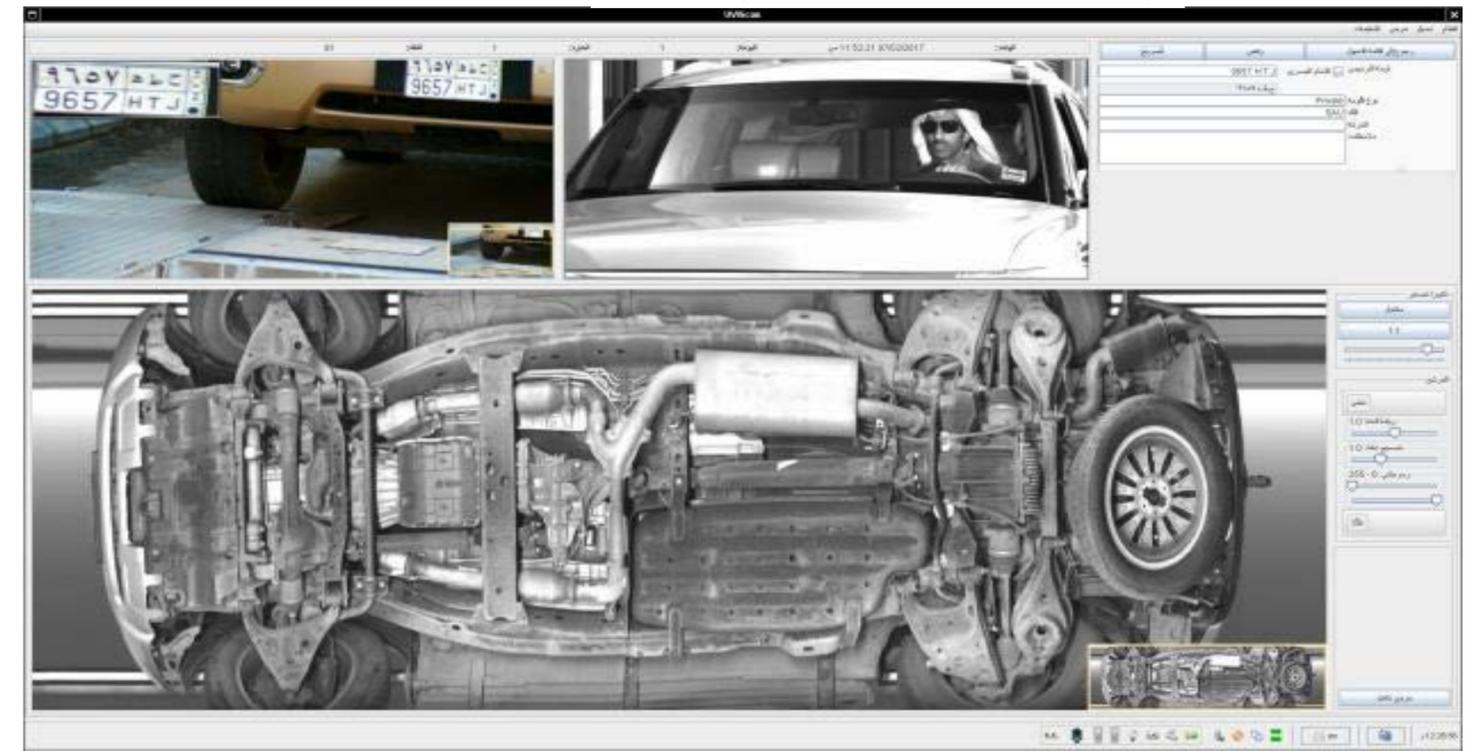

**COMMAND, CONTROL, COMMUNICATION,
COMPUTING AND ARTIFICIAL INTELLIGENCE**

end-to-end system provides Autonomous Remote Operations (ARO) so no human intervention is needed to maintain operational continuity 24/7.

UVSS – Under Vehicle Surveillance System

UVSS used for police, border and/or military checkpoints, and for the entrance of all kind of high security locations & to be integrated with LPR (License Plate Recognition) & DFR (Driver Face Recognition)
